### ***Restriction Requirement***

2. Please Note: In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Ph.D., Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

In view of the delays in the mail at the present time, the office strongly encourages faxing responses.

3. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-5, 10-13, and 16-25, drawn to a compound that inhibits the binding of the free light chain of immunoglobulin (Ig) to mast cells and a composition thereof that is not THP or LC-binding peptide fragments thereof; classified in Class 424, subclass 184.1, and Class 530, subclass 300.

II. Claims 6-8 and 26-29, drawn to a method of screening/process for producing a series of compounds based on their ability to bind the free light chain of Ig comprising a labeled compound capable of binding free light chain of Ig and competing with a peptide, classified in Class 435, subclass 7.93.

III. Claims 9, drawn to a method screening a series of compounds based on their ability to reduce sensitization of mast cells comprising incubating at least one compound with a labeled free light chain of Ig with mast cells, and detecting reduced binding of the labeled Ig; classified in Class 435, subclass 4.

IV. Claims 14-15, drawn to a method of diagnosing a disease in a patient comprising contacting a foreign antigen with the body fluid and determining the presence of a complex; classified in Class 435, subclass 7.1.

V. Claim 30, drawn to a method of treating a disease comprising administering a compound; classified in Class 424, subclass 278.1.

VI. Claim 13, drawn to a pharmaceutical composition comprising Tamm-Horsefall glycoprotein (THP), classified in Class 424, subclass 184.1

Art Unit: 1644

VII. Claim 13, drawn to a pharmaceutical composition comprising LC-binding peptides, classified in Class 424, subclass 184.1

4. Groups I, VI, and VII are different products. The compositions of a compound that inhibits the binding of the free light chain of immunoglobulin (Ig) to mast cells, Tamm-Horsefall glycoprotein (THP), and LC-binding peptides differ with respect to their structures and physicochemical properties; therefore each product is patentably distinct.

5. Groups II-V are different methods. The inventions as grouped in Groups II-V are distinct, each from the other, because they represent different inventive endeavors as one does not suggest the other; therefore, each method is patentably distinct.

6. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Therefore restriction for examination purposes as indicated is proper.

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Megan Jamroz whose telephone number is (703) 308-8365. The examiner can normally be reached Monday through Friday from 8:00 AM to 4:30 PM. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.

Papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax Center located in Crystal Mall 1.
